Overview

I am a seasoned Front-End and Back-End Developer with a specialization in WordPress, bringing over three years of experience in building comprehensive web solutions for diverse businesses. As a Team Leader, I guide projects from conception to completion, ensuring that every phase of development meets the highest standards of quality and efficiency. I am constantly seeking improvement and progress, with a strong commitment to continuous learning and development in the field of web technologies.

Work Experience

Advanced WordPress Expertise and Project Leadership at digihive company

(Currently)

- I deepened my expertise in WordPress, particularly focusing on its CMS capabilities, enhancing both functionality and user experience.
- Recognized for maintaining high code standards and achieving 'pixel-perfect' precision, I was responsible for overseeing code quality within the company and providing constructive feedback to colleagues.
- I actively engaged with clients to understand their requirements, ensuring that projects were completed according to their needs.
- I successfully managed and executed entire projects single-handedly from inception to completion, demonstrating strong project management skills.
- I led a team initially comprising two members, which expanded to five, fostering a cooperative team spirit and facilitating knowledge.
- Utilized project management tools for streamlined task management, achieving timely, client-approved results.
- Senior Front-End & WordPress Developer, collaborating with experts to create advanced web solutions.
- Developing my skills in GSAP to enhance web interfaces with dynamic animations for better interactivity and visual appeal.
- Advancing my technical skills in React.js to proficiently develop responsive user interfaces.
- Improving my English communication to effectively collaborate in global settings.
